

## Environmental Policy

Hitachi Zosen  
INOVA

The Executive Board of Hitachi Zosen Inova AG are committed to ensuring that the protection of the environment is firmly embedded in both our company's and employees' culture and will endeavour to influence our suppliers and customers in a similar strategic environmental manner.

We use our technological capability for the continued environmental improvement of our products and processes by technical innovations throughout their lifecycle. These activities include the entire value-added chain of our company and means that we shall:

- | comply with all applicable environmental laws and regulations as well as any additional contractual requirements when we design, construct or commission our plants or provide after sale services;
- | undertake all efforts to design and construct our plants so they will protect the environment and minimise resource use to the greatest extent possible;
- | take action to prevent pollution, reduce waste and minimise the consumption of resources in all areas of our business;
- | consider environmentally responsible behaviour as an obligation for every employee and incorporate this attitude into all our activities (office, construction site, business trips, laboratory etc.) in order to limit environmental impact to the greatest extent possible;
- | encourage a policy of sustainable procurement and environmental stewardship amongst our suppliers and subcontractors through proactive management, and endeavour to influence other key stakeholders;
- | encourage and enhance biodiversity and ecology where practicable;
- | commit to continual improvement of environmental performance by measuring against a set of stretching environmental targets and reviewing progress at the management level.

This policy is binding to the Executive Board, managers and employees of Hitachi Zosen Inova AG. It will be communicated to all staff, subcontractors and suppliers and will be available to the public on the Hitachi Zosen Inova web site. This policy shall be reviewed annually.

Zürich, 26<sup>th</sup> February 2019
