### **HZI Germany and HZI Kraftwerkstechnik Merge**

**Cologne/Braschwitz, Germany.** HZI Germany, which is based in Cologne and specialises in engineering, and HZI Kraftwerkstechnik, which is based in Braschwitz and specialises in overhauls, are merging at the beginning of October. In future, both companies will operate under the name Hitachi Zosen Inova Deutschland GmbH (HZI Germany). The aim is to optimise existing structures and expand the range of services for customers, with the option of being able to offer complete packages for revisions or modernisations and reduce lead times even further. The existing contacts in sales and administration will remain the same. The new Hitachi Zosen Inova Deutschland GmbH employs 60 people.

In addition to services for Energy from Waste plants, the service portfolio of HZI Germany also includes services for industrial sectors such as power plants, paper and sugar production. HZI Germany has access to the entire know-how and experience of the worldwide HZI Service Group.

**About Hitachi Zosen Inova Germany GmbH:**

Hitachi Zosen Inova Deutschland GmbH (HZID) is a subsidiary of Zurich-based Hitachi Zosen Inova (HZI). Hitachi Zosen Inova is a global market leader in the fields of Energy from Waste (EfW) and Renewable Gas. The company acts as an engineering, procurement and construction (EPC) contractor and project developer, delivering complete turnkey plants and system solutions for thermal and biological EfW recovery. Hitachi Zosen Inova Deutschland GmbH is headquartered in Cologne and Braschwitz. Its business focuses on extended services for industrial plants, particularly in the Energy from Waste segment, and spans extension, modernisation and revision work as well as building complete new lines and lot projects. HZI's Service Group combines its own research and development with comprehensive manufacturing and erection capabilities to provide support throughout the entire plant life cycle. HZI's customers range from experienced waste management companies to up-and-coming partners in new markets worldwide. Its innovative and reliable waste, flue gas treatment, gas upgrading and power-to-gas solutions have been part of more than 700 reference projects delivered since 1933.
